## About Me

I studied a full-stack web development bootcamp focused on JavaScript, React, Node.js, and MongoDB. I'm passionate about building efficient and user-friendly applications, and I'm looking forward to joining a dynamic team where I can grow professionally.

## Projects

### Galileo Psicologos

- Developed full-stack web platform for managing patient appointments and communication.
- Implemented **Google authentication**, contact forms with **Brevo email integration**, and responsive design for seamless user experience.
- Improved accessibility and user engagement through modern **Tailwind CSS** interface.
- Technologies: **React (frontend)**, **Node.js/Express (backend)**, **MongoDB (database)**, **Brevo API**.

### AirB2B

- Developed full-stack web platform for booking and managing corporate accommodations.
- Implemented authentication, booking system, user reviews, and secure online payments with Stripe.
- Reduced response times by optimizing backend queries and API structure.
- Technologies: **React (frontend)**, **Node.js/Express (backend)**, **MongoDB (database)**, **Stripe API**.

### MiMusico!

- Developed complete frontend and backend for a platform to search and post ads for second-hand instruments and music bands.
- I reduced loading times by 50% through backend optimization.
- Technologies: **React (frontend)**, **Node.js/Express (backend)**, **database (e.g., MongoDB)**.
